Preface

The report that follows is a compilation and analysis of selected data reported by North Carolina public libraries for July 1, 1995 through June 30, 1996. The Federal-State Cooperative System (FSCS) report submitted to the National Center for Educational Statistics is generated from this data.

Included in this year's directory are two special tables: Five-Year Statewide Summary and Selected Statistics by Legal Service Population. These tables show comparisons for selected data elements or overviews of selected groups of data.

Table 1 of the 13 numbered tables is a profile table. It provides information about branches, bookmobiles, legal service population, square miles, annual hours, and friends groups.

Within the tables, libraries are grouped by type (county, regional or municipal). Within each type, libraries are listed in descending order by legal size service population. This is done to facilitate comparisons with other libraries serving a similar size legal service population. Legal service population figures are from the 1995 North Carolina projections from the State Data Center.

The use of N/A in this report means that the information was not reported to the State Library. Also note that the statistics represent the 1995-96 fiscal year while the directory lists the latest available information.

The Library Development Section always welcomes comments and suggestions. If you have suggestions about particular data elements, the tables, or this directory please contact any consultant in the Library Development Section.

The statistics are also available on diskette in Quattro Pro version 6.0. Additional copies of this publication as well as customized reports, presentation quality graphics, or other special tables are available on request.
